Education

Lovely Professional University

Bachelor of Technology – Computer Science and Engineering

Expected May 2027

Phagwara, Punjab

Experience

FounDev Studio

April 2025 – November 2025

Backend Developer Intern

Remote

- Delivered backend services in Node.js and Java across **3 production projects**, including a school management system, IoT platform, and stock analytics application.
- Structured PostgreSQL and MongoDB databases, optimized SQL queries, and delivered **15+ REST API endpoints** for scalable backend workflows.
- Integrated JWT authentication, Razorpay, Stripe, and AWS services, contributing to **100% secure authentication and payment workflows**.

Projects

PDF Assistant RAG | *Python, FastAPI, LangChain, ChromaDB, Docker* | [Live Link](#)

2026

- Created an open-source RAG assistant with **40+ GitHub stars**, **100+ forks**, and **80+ contributors** using modular retrieval and LLM services.
- Combined Sentence Transformers embeddings with Cross-Encoder reranking, reducing retrieved context from **10 to 5** chunks while improving answer relevance.
- Automated CI/CD with GitHub Actions, integrating **4 security scanners** (Bandit, Trivy, Snyk, OWASP ZAP) before deployment.

ZenithFlow | *TypeScript, Next.js, Express.js, PostgreSQL, Supabase* | [Live Link](#)

2026

- Created a full-stack productivity platform with **10+ integrated modules**, including tasks, notes, finance, habits, and AI coaching.
- Added subscription plans, role-based authentication, and AI-powered assistance backed by PostgreSQL Row-Level Security (RLS).
- Released a Progressive Web App supporting desktop and mobile with offline capabilities.

Deepfake Detection System | *Python, FastAPI, PyTorch, OpenCV, Docker* | [Live Link](#)

2026

- Engineered a deepfake detection pipeline by sampling **12 video frames** per upload using OpenCV and PyTorch.
- Generated structured confidence scores through REST APIs with an **O(n)** frame processing pipeline.
- Containerized the application with Docker and completed **8 production deployments** with Swagger-documented APIs.

Technical Skills

Languages : Java, Python, C++, TypeScript, JavaScript, SQL
Backend : FastAPI, Express.js, Node.js, REST APIs, JWT, Microservices
AI / ML : PyTorch, LangChain, Hugging Face, ChromaDB, Scikit-learn
Databases : PostgreSQL, MongoDB, Supabase
Cloud & Tools : AWS, Docker, Git, GitHub Actions, Linux

Certifications

AWS Machine Learning Foundations: Amazon Web Services June 2025
Generative AI with AWS: Udacity July 2025
GitHub Foundations: Github Jan 2025

Achievements

LeetCode: Solved 200+ Data Structures and Algorithms problems in Python and C++.

EncryptEdge: Community Lead, organized **10+** technical workshops, Cybersecurity events, and Capture The Flag competitions.

GirlScript Summer of Code 2026: Project Admin and Mentor, Reviewed pull requests and mentored **80+** open-source contributors.
